Abay Aliyev

Web Developer

As a passionate web developer with a creative edge, I bring three years of expertise to the table. My focus areas encompass HTML, CSS, JavaScript, and React, allowing me to craft dynamic web applications that captivate users. I'm driven by the pursuit of perfection and consistently seek opportunities to elevate user experiences. With my skills and dedication, I'm poised to make a significant impact in the world of web development.

WORK EXPERIENCE

Freelance
self-employed

11/2022 - 10/2023

"During my studies, I freelanced as a web developer for almost a year. I specialized in HTML, CSS, JavaScript, and React, creating dynamic websites and applications for diverse clients. This experience enhanced my skills and problem-solving abilities, making me a versatile web developer."

Frontend Developer Intern
Pro Skill

12/2023 - Present   *Astana, Kazakhstan*

Startup, developing a web application to order and visualize data for other companies.

Achievements/Tasks

- **Responsive UI Development** : Created adaptive UI for authentication and main pages using Tailwind CSS to ensure compatibility across various devices.
- **Reusable Component Creation** : Developed reusable components utilizing higher-order components and class-variance-authority, reducing development errors and improving efficiency.
- **TypeScript Proficiency** : Gained proficiency in TypeScript, enhancing component reliability and reducing runtime errors through strong typing.
- **Form Validation and Management** : Implemented ZOD for robust form validation and used react-hook-form for managing sign-in and sign-up forms, improving user input accuracy and experience.
- **Authentication System Integration** : Established a secure authentication system using JWT for access and refresh tokens, safeguarding application routes.
- **Routing Configuration** : Set up application routing with react-router, managing public and protected routes for navigation.
- **Data Visualization** : Utilized Recharts for visualizing company data through pie charts and bar charts, aiding in clearer data representation.
